Street Improvement Plans to Be Displayed at Open House

Snoqualmie, WA – The Falls Ave SE and SE Cedar St Rehabilitation and Infrastructure Improvement Project is on the horizon. Local residents and businesses are invited to view and discuss project plans at an open house on May 16, 6-9 p.m. in the Snoqualmie City Hall Council Chambers at 38624 SE River Street.

The locations of general infrastructure improvements currently proposed are as follows:

- SE Cedar St from Silva Ave SE to SE Fir Street
- SE 90th St from Railroad Ave SE (SR 202) to Falls Ave SE
- Entire width of Falls Ave SE from SE 90th St to the intersection of SE Beta St
- SE Epsilon St from Schusman Ave SE to Falls Ave SE
- SE Beta St from Schusman Ave SE to Railroad Ave SE (SR 202)

During this project, the existing roadway including curb, gutter, planter, and sidewalks will be removed and replaced. Sidewalks, sidewalk ramps, and street signs will be evaluated for compliance, constructed, and installed per standards and guidelines. The storm drainage, water main, and sanitary sewer lines will be evaluated and replaced where needed.

Preliminary designs will be displayed at the open house for viewing. City staff from the Planning and Public Works Departments will be available to discuss design plans, as well as designers from KPG, which worked on Phase I of the recent Town Center Infrastructure Improvement Project and will continue work on Phase II of that project.

Questions may be directed to Kamal Mahmoud, City of Snoqualmie Project Engineer, at 425-831-4919 or kmahmoud@ci.snoqualmie.wa.us.
